

Assignment 01

1. Check Positive Number

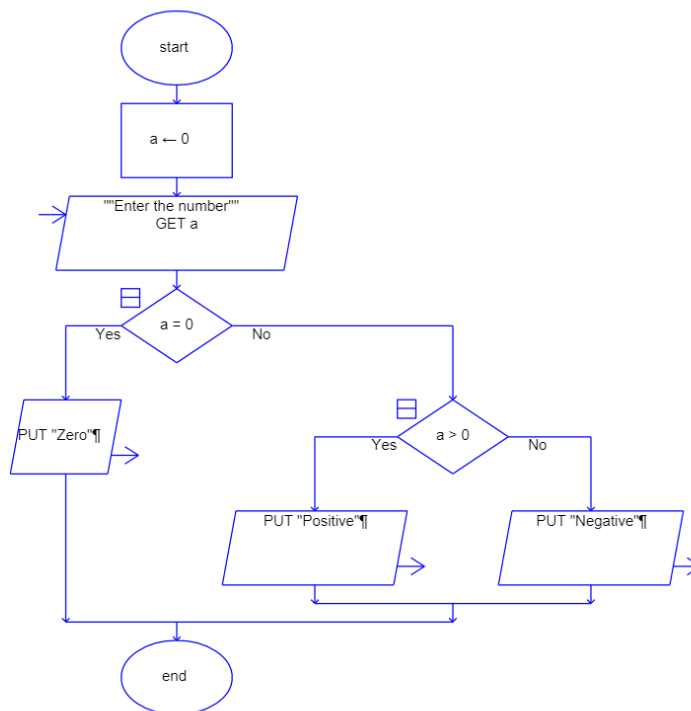

Program & Output:

```
1  import java.util.Scanner;
2
3  public class Pos {
4      Run | Debug
5      public static void main(String[] args) {
6          System.out.print("Enter a number: ");
7          Scanner scan = new Scanner(System.in);
8          int a = scan.nextInt();
9          scan.close();
10
11          if (a==0){
12              System.out.print("Zero");
13          }
14          else{
15              String result= a > 0 ? "Positive" : "Negative";
16              System.out.println(result);
17          }
18      }
19  }
```

Problems 2 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\" ; if ($?) { javac Pos.java }
Enter a number: 5
Positive
PS D:\CDAC\Logic Building 01\Logic building assignment> |
```

2. Check Negative Number

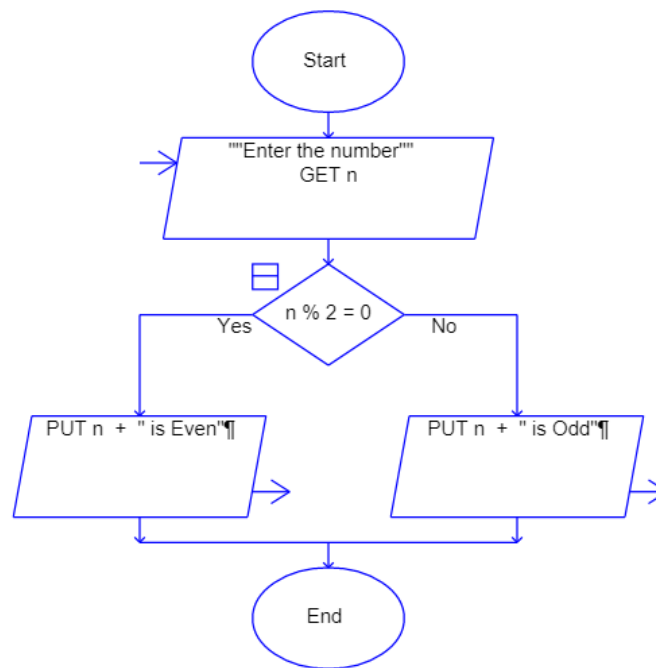

Program & Output:

```
Logic Building 01 > Logic building assignment > J Neg.java > ...
1  import java.util.Scanner;
2
3  public class Neg {
4      Run | Debug
5      public static void main(String[] args) {
6          System.out.print("Enter a number: ");
7          Scanner scan = new Scanner(System.in);
8          int a = scan.nextInt();
9          scan.close();
10
11         if (a==0){
12             System.out.print("Zero");
13         }
14         else{
15             String result= a > 0 ? "Positive" : "Negative";
16             System.out.println(result);
17         }
18     }
19 }
```

Problems 2 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\" ; if ($?) { javac Neg.java
Enter a number: -2
Negative
PS D:\CDAC\Logic Building 01\Logic building assignment> 
```

3. Check Odd or Even Number

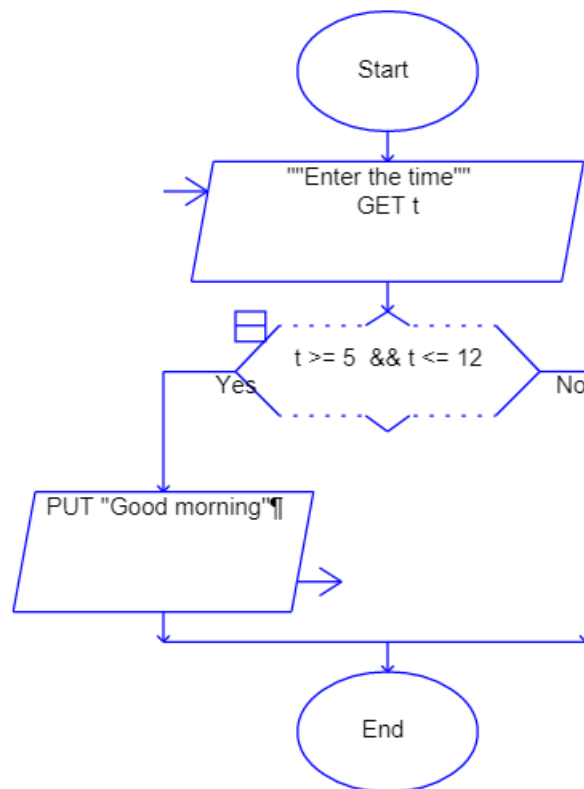

Program & Output:

```
Logic Building 01 > Logic building assignment > J EvenOdd.java > EvenOdd > main(String[])
1  import java.util.Scanner;
2
3  public class EvenOdd{
4      Run | Debug
5      public static void main(String[] args) {
6          System.out.print("Enter a number: ");
7          Scanner scan = new Scanner(System.in);
8          int n = scan.nextInt();
9          scan.close();
10
11          String status = n % 2 == 0 ? " is Even" : " is Odd";
12          System.out.println( n + status);
13      }
14  }
```

Problems 2 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\"; if ($?) { javac EvenOdd.
Enter a number: 5
5 is Odd
PS D:\CDAC\Logic Building 01\Logic building assignment> |
```

4. Display Good Morning Message Based on Time

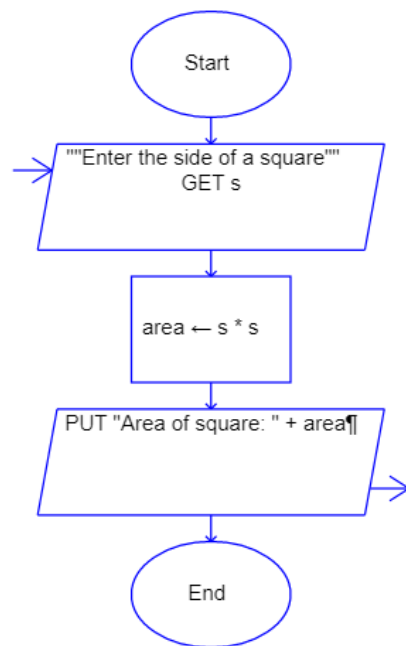

Program & Output:

```
1  import java.util.Scanner;
2
3  public class TimeGreeting {
4      public static void main(String[] args) {
5          System.out.print("Enter the time (24-hour format): ");
6          Scanner scan = new Scanner(System.in);
7          int t = scan.nextInt();
8          scan.close();
9
10         if (t >= 5 && t <= 12){
11             System.out.print("Good Morning");
12         }
13     }
14 }
15
```

Problems 8 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\" ; if ($?) { javac TimeGreeting.java
Enter the time (24-hour format): 5
Good Morning
PS D:\CDAC\Logic Building 01\Logic building assignment> 
```

5. Print Area of a Square

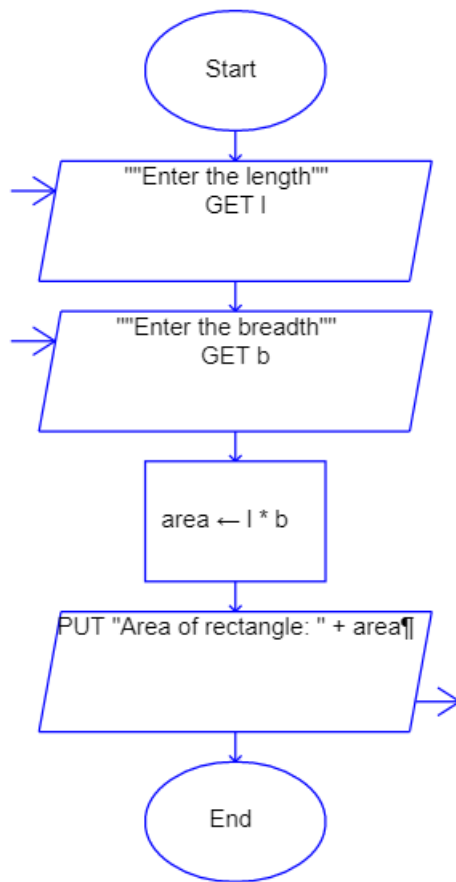

Program & Output:

```
1  import java.util.Scanner;
2
3  public class AreaSq {
4      Run | Debug
5      public static void main(String[] args) {
6          System.out.print("Enter the side of a square: ");
7          Scanner scan = new Scanner(System.in);
8          int s = scan.nextInt();
9          scan.close();
10
11         int area = s * s;
12         System.out.print("Area of square: " + area);
13     }
14 }
```

Problems 8 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\" ; if ($?) { javac AreaSq.java
Enter the side of a square: 5
Area of square: 25
PS D:\CDAC\Logic Building 01\Logic building assignment> 
```

6. Print Area of a Rectangle

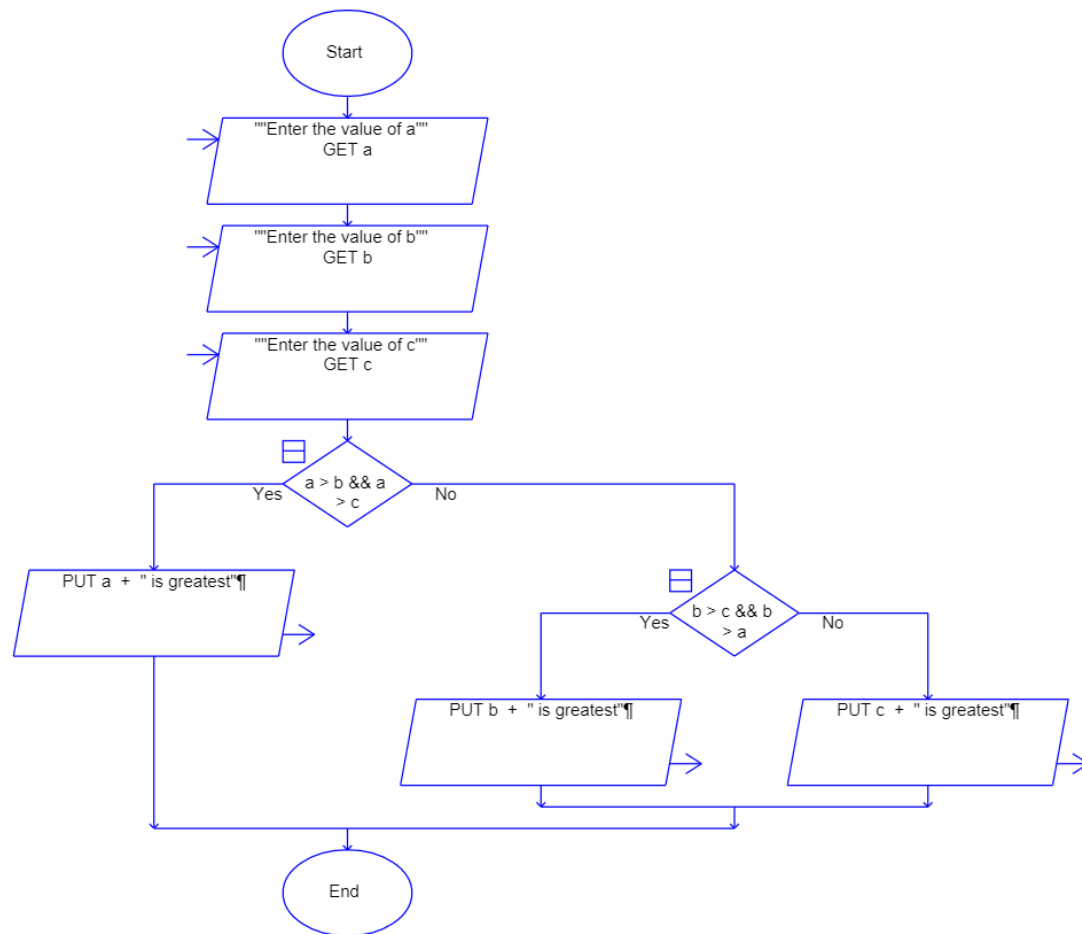

Program & Output:

```
1  import java.util.Scanner;
2
3  public class AreaRect {
4      Run | Debug
5      public static void main(String[] args) {
6          System.out.print("Enter length: ");
7          Scanner scan = new Scanner(System.in);
8          int l = scan.nextInt();
9          System.out.print("Enter breadth: ");
10         int b = scan.nextInt();
11         scan.close();
12
13         int area = l * b;
14         System.out.print("Area of rectangle: " + area);
15     }
16 }
```

Problems 8 Output Debug Console Terminal Ports

```
PS D:\CDAC> cd "d:\CDAC\Logic Building 01\Logic building assignment\" ; if ($?) { javac AreaRe
Enter length: 4
Enter breadth: 5
Area of rectangle: 20
PS D:\CDAC\Logic Building 01\Logic building assignment> 
```

7. Find the Largest of Three Numbers

Program & Output:

```
1 import java.util.Scanner;
2
3 public class GreatestOfThree {
    Run | Debug
4     public static void main(String[] args) {
5         Scanner scan = new Scanner(System.in);
6         System.out.print("Enter the value of a: ");
7         int a= scan.nextInt();
8         System.out.print("Enter the value of b: ");
9         int b= scan.nextInt();
10        System.out.print("Enter the value of c: ");
11        int c= scan.nextInt();
12        scan.close();
13
14        int result;
15
16        if (a > b && a > c){
17            result = a;
18        } else if (b > a && b > c){
19            result = b;
20        }
21        else {
22            result = c;
23        }
24        /* int result = Math.max(a, Math.max(b, c)); */
25        System.out.println(result + " is greatest");
26    }
27 }
```

```
PS D:\CDAC\Logic Building 01\Logic building assignment> cd "d:\CDAC\Logic Building 01\Logic b
Enter the value of a: 4
Enter the value of b: -1
Enter the value of c: 5
5 is greatest
PS D:\CDAC\Logic Building 01\Logic building assignment> 
```
